Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 February 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restriction

Applicant's election of the claims of Group I, with traverse, is acknowledged.

Applicant argues that no adequate reasons and/or examples have been provided to support a conclusion of patentable distinctiveness between the identified groups and that no burden exists upon the Office in examining the entire application. The examiner respectfully disagrees for the reasons outlined in the original election/restriction requirement. The examiner additionally points out, as objective evidence that the inventions of Groups I and II are patentably distinct, that the current USPTO classification system classifies the claims of Group I in class 568 subclasses 699 and 868 and the claim of Group II in class 422 subclasses 129+ and 243+. Classes 568 and 422 are unrelated and there is no special technical feature in the instant invention which relates them. The election/restriction is hereby made FINAL.

Oath/Declaration

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

The specification to which the oath or declaration is directed has not been adequately identified. See MPEP § 602. (Applicant has omitted the required PCT international application number in the line next to the checked box on page 1 of the oath/declaration.)

Specification

The disclosure is objected to because of the following informalities: on page 1, line 11, the phrase "...distillation of the 1,2-propylene oxide formed..." would seem to be incorrect. The examiner respectfully suggests that the proper compound of interest is 1,2-propylene glycol. Appropriate correction is required. The examiner respectfully requests applicant's assistance in correcting any other minor spelling and/or grammatical errors which may be present.

The specification is additionally objected to because it does not contain a section entitled: Brief Description of the Drawings. See MPEP 608.01(f).

Finally, the parentage of the application should appear as the first line after the title. See MPEP 1893.03(c).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 16, 18, 24 and 27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The identity of the "key components" is unclear because it is undefined.

Allowable Subject Matter

Claims 11-15, 17, 19-23, 25 and 26 are allowed. Claims 16, 18, 24 and 27 would be allowable once the 112 rejection outlined above has been overcome. The following is a statement of reasons for the indication of allowable subject matter:

The closest prior art appears to be WO 00/07965 whose US equivalent (US 6,479,680) is used for the purposes of this Office Action. US 6,479,680 teaches a process related to that of the instant invention (see Example 1, column 10, line 24).

At best, it might have been obvious to try the incorporation of a divided wall column into the process of the prior art in order to purify a byproduct glycol, however, an 'obvious to try' standard is impermissible in two situations: 1) where the prior art gives no indication as to which of numerous parameters are critical, or gives no indication as to which of many possible choices is likely to be successful; and 2) where the prior art gives only general guidance with respect to the form of the invention but not how to achieve it new areas of technology or in fields of experimentation which are only seemingly promising. *In re O'Farrell*, 853 F2d 894, 7 USPQ 2d 1673, 1681 (Fed. Cir. 1988). In the instant case, 1) above applies.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian J. Davis whose telephone number is 571-272-0638. The examiner can normally be reached on M-F 8:30-5:00.
